# Learners in Today's Info Environment

- Students are overwhelmed, uncertain about “starting points” for academic research
- Students often do not understand the nature and scope of academic research assignments
- Students report being confused about the “open-endedness” of the research process—how to know when to conclude an assignment without precise instructions?

Alison Head, “Project Information Literacy: What Can Be Learned about the Information-Seeking Behavior of Today's College Students?” Proceedings of the ACRL National Conference (2013), Indianapolis, IN, pp. 472-482.

# Learners in Today's Info Environment

- Students use “tried and true” tools and resources (Google, Wikipedia, a small set of databases)
- Students may not expand their repertoire because of familiar assignment types (standard research paper)
- Students carry over to college many of their high school routines and practices for research

Alison Head, “Project Information Literacy: What Can Be Learned about the Information-Seeking Behavior of Today's College Students?” Proceedings of the ACRL National Conference (2013), Indianapolis, IN, pp. 472-482.

# Learners in Today's Info Environment

## Context

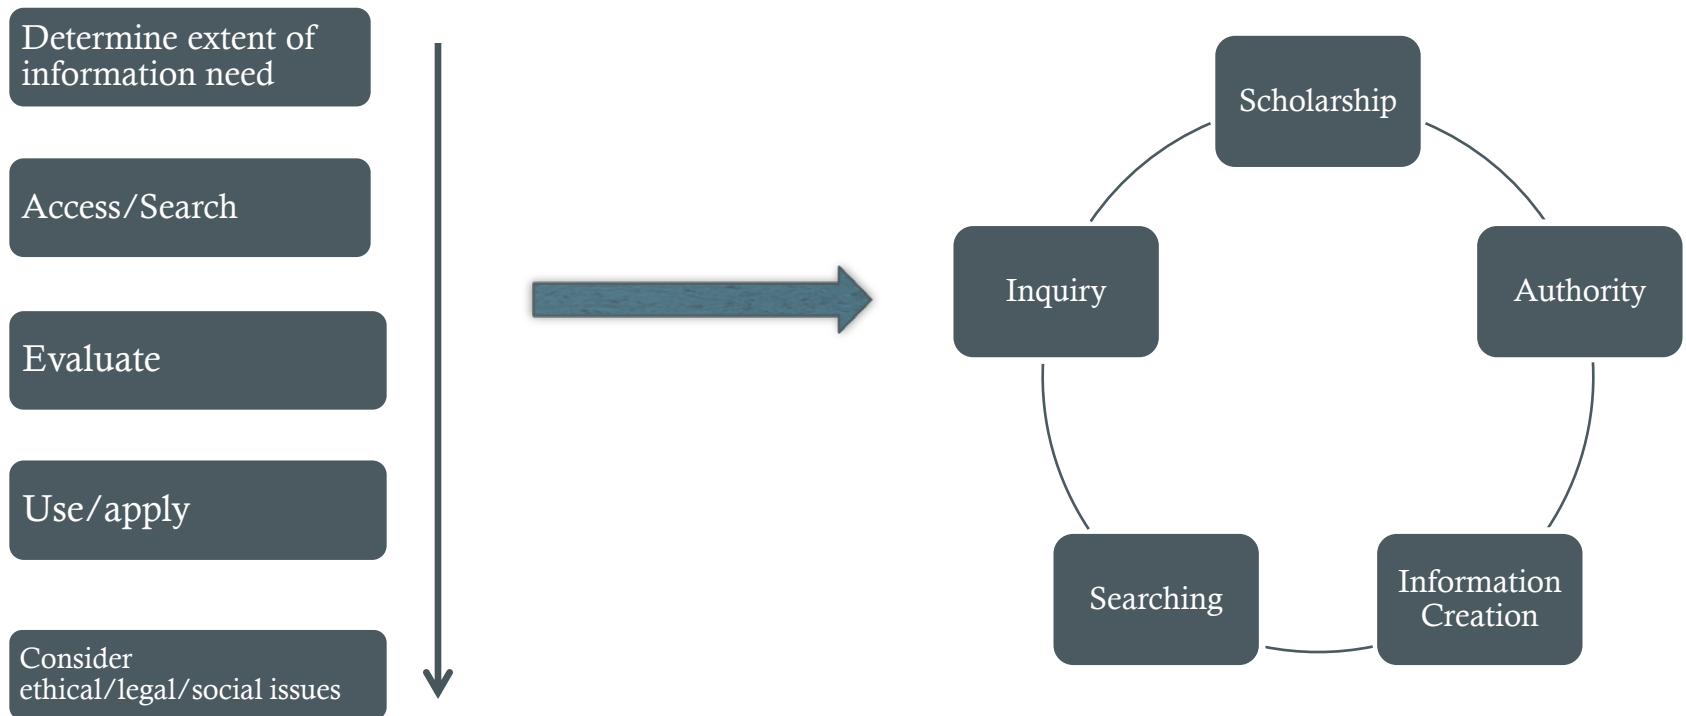

The single most important missing element for today's learners in becoming information literate

- **The “Big Picture”** (summary, background, overview)
- **Information Gathering** (finding and securing relevant sources)
- **Language** (understanding the meaning of words)
- **Situational** (knowing the expectations of assignments, the surrounding circumstances)

Alison Head, “Project Information Literacy: What Can Be Learned about the Information-Seeking Behavior of Today's College Students?” Proceedings of the ACRL National Conference (2013), Indianapolis, IN, pp. 472-482.

# The Framework

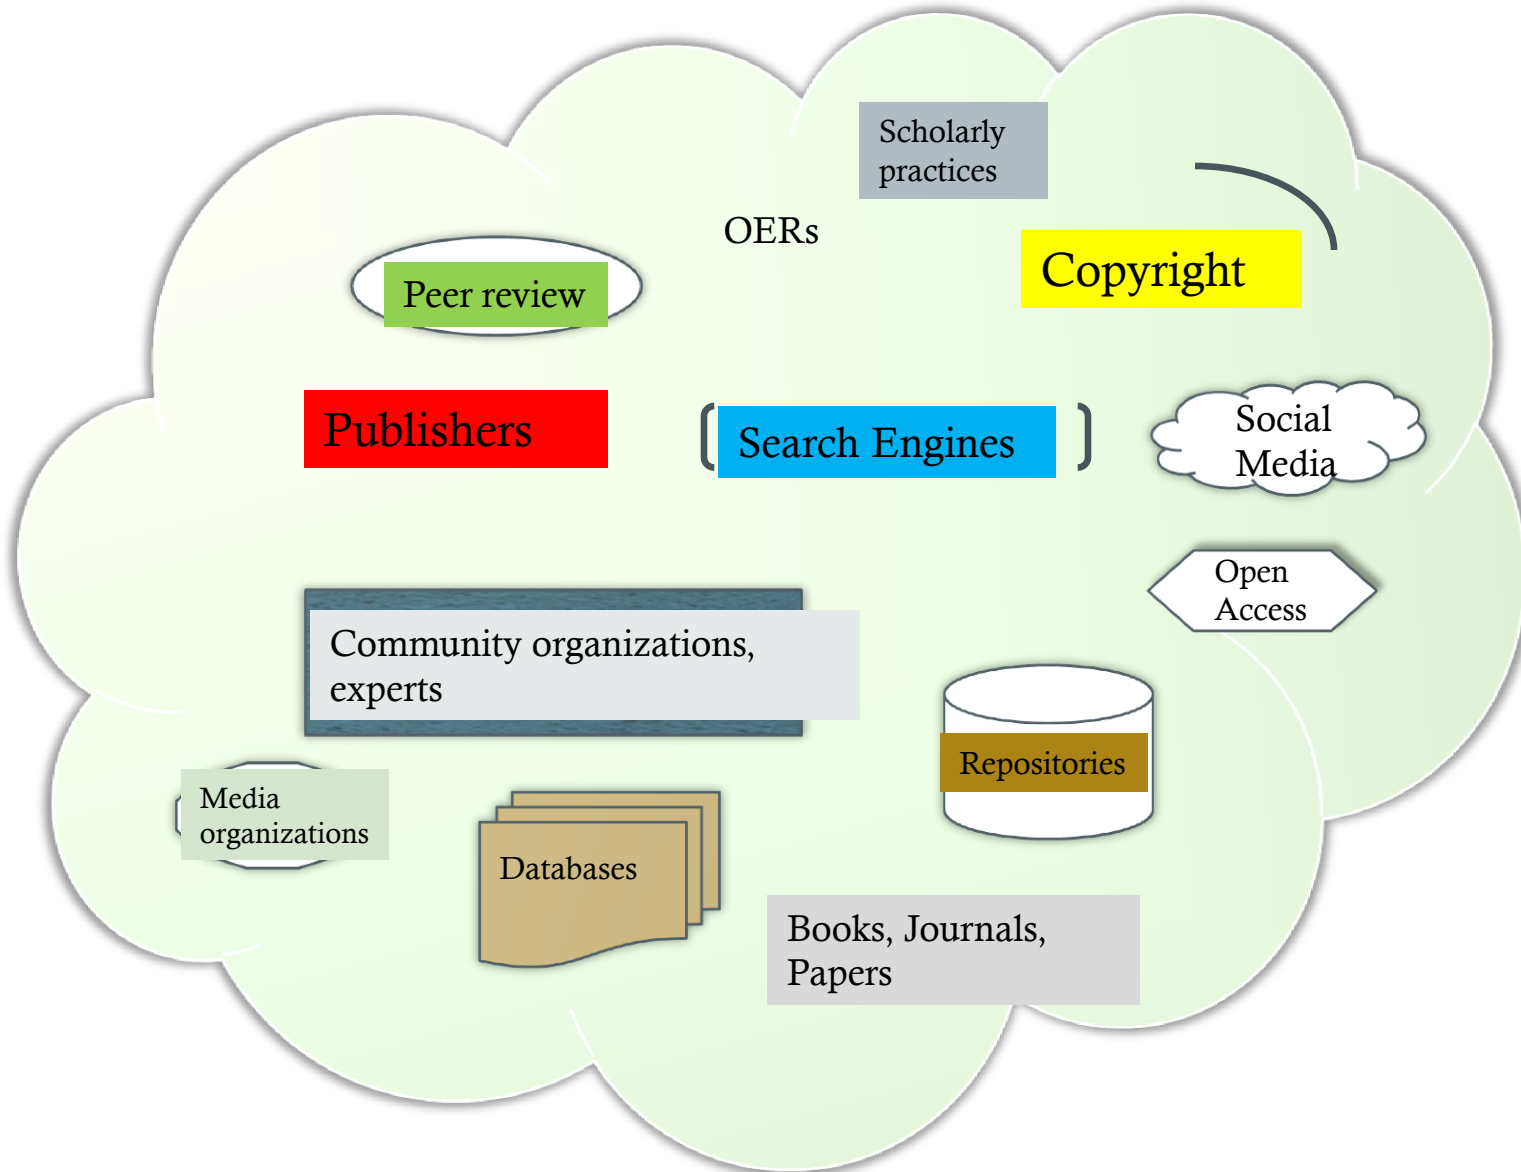

# From Standards to Framework

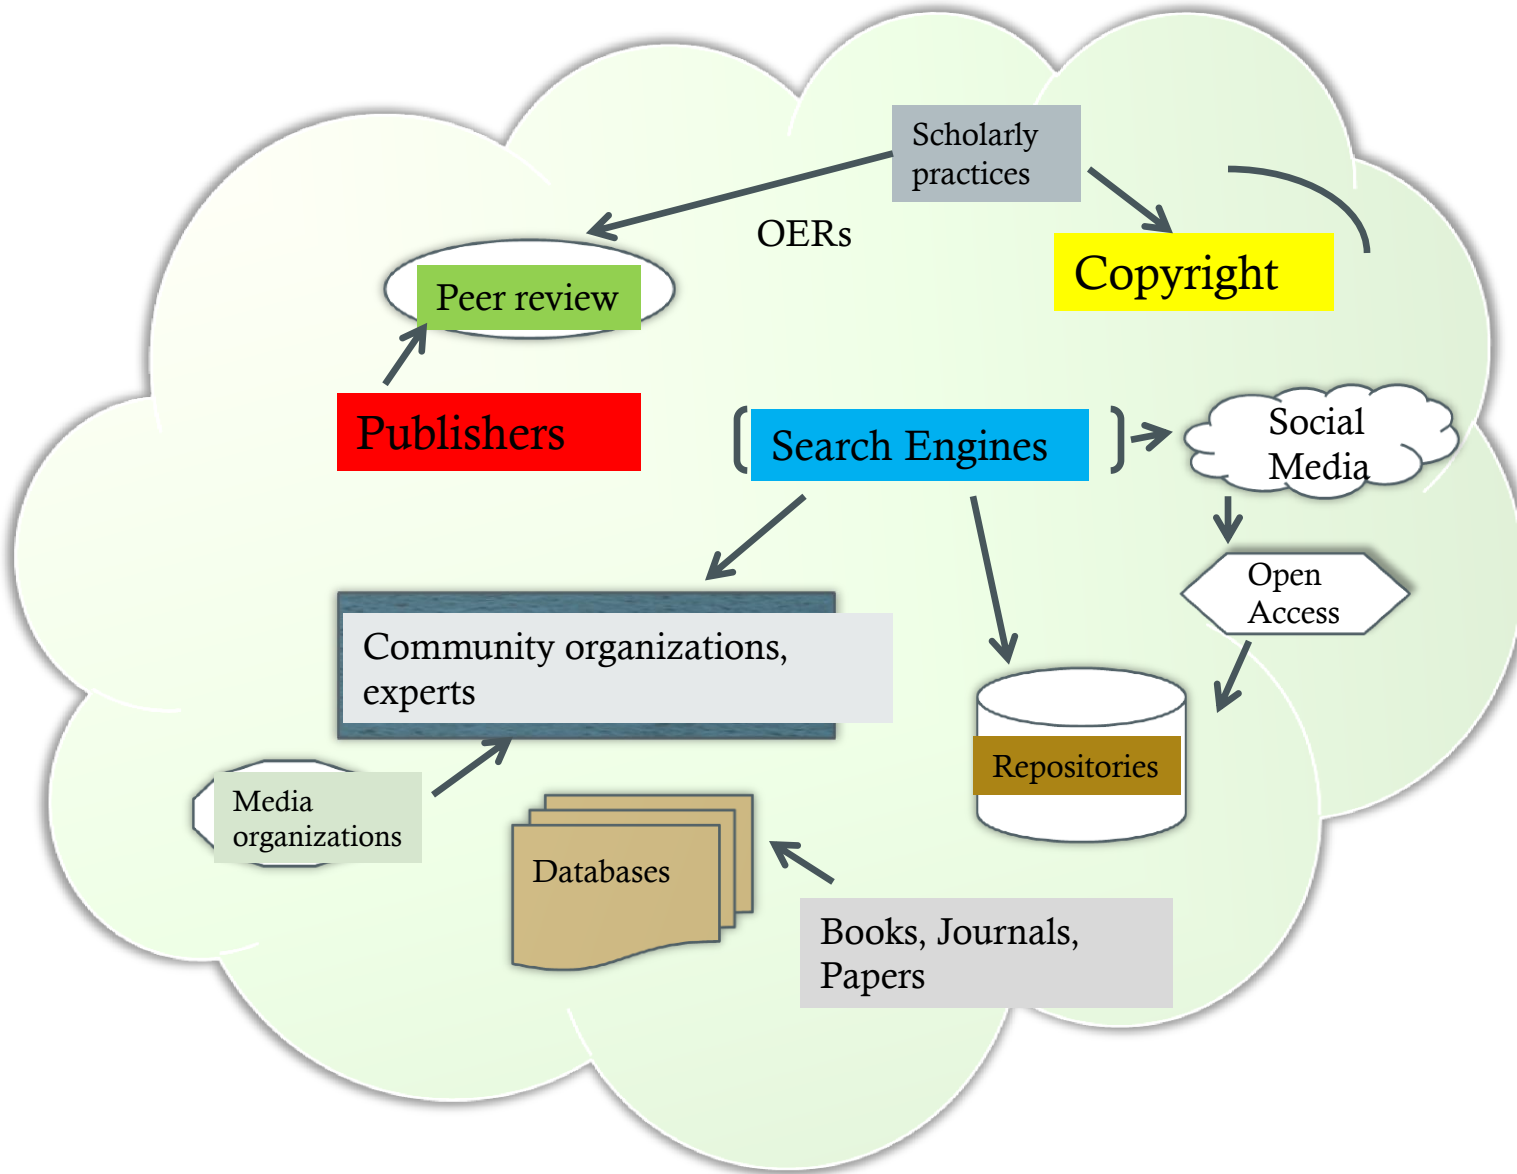

# Thinking about a New Way of Framing Information Literacy

- Focus on the information landscape or ecosystem
- Help students to understand the “why”
- Transcend particular skills and resources
- Focus on the human processes of knowledge creation, searching, reporting, writing, presenting instead of just the artifacts of these processes

# Goals for the Framework

- A flexible system of learning information literacy concepts that can be tailored to individual settings
- Recognizes the participatory, collaborative information environment: learners as content/knowledge creators, not just consumers

(Mackey and Jacobson, "Reframing Information Literacy as a Metaliteracy," *C & RL*, 72 (1) 2011, pp. 62-78)

# Goals for the Framework

- Importance of metacognition (thinking about one's own thinking)

(Mackey and Jacobson, "Reframing Information Literacy as a Metaliteracy," *C & RL*, 72 (1) 2011, pp. 62- 78)

- Recognition of affective factors (dispositions/habits of mind)

# Major Elements of the Framework

<http://pixabay.com/en/puzzle-learn-arrangement-components-210785/>

# Threshold Concepts

# Threshold Concepts

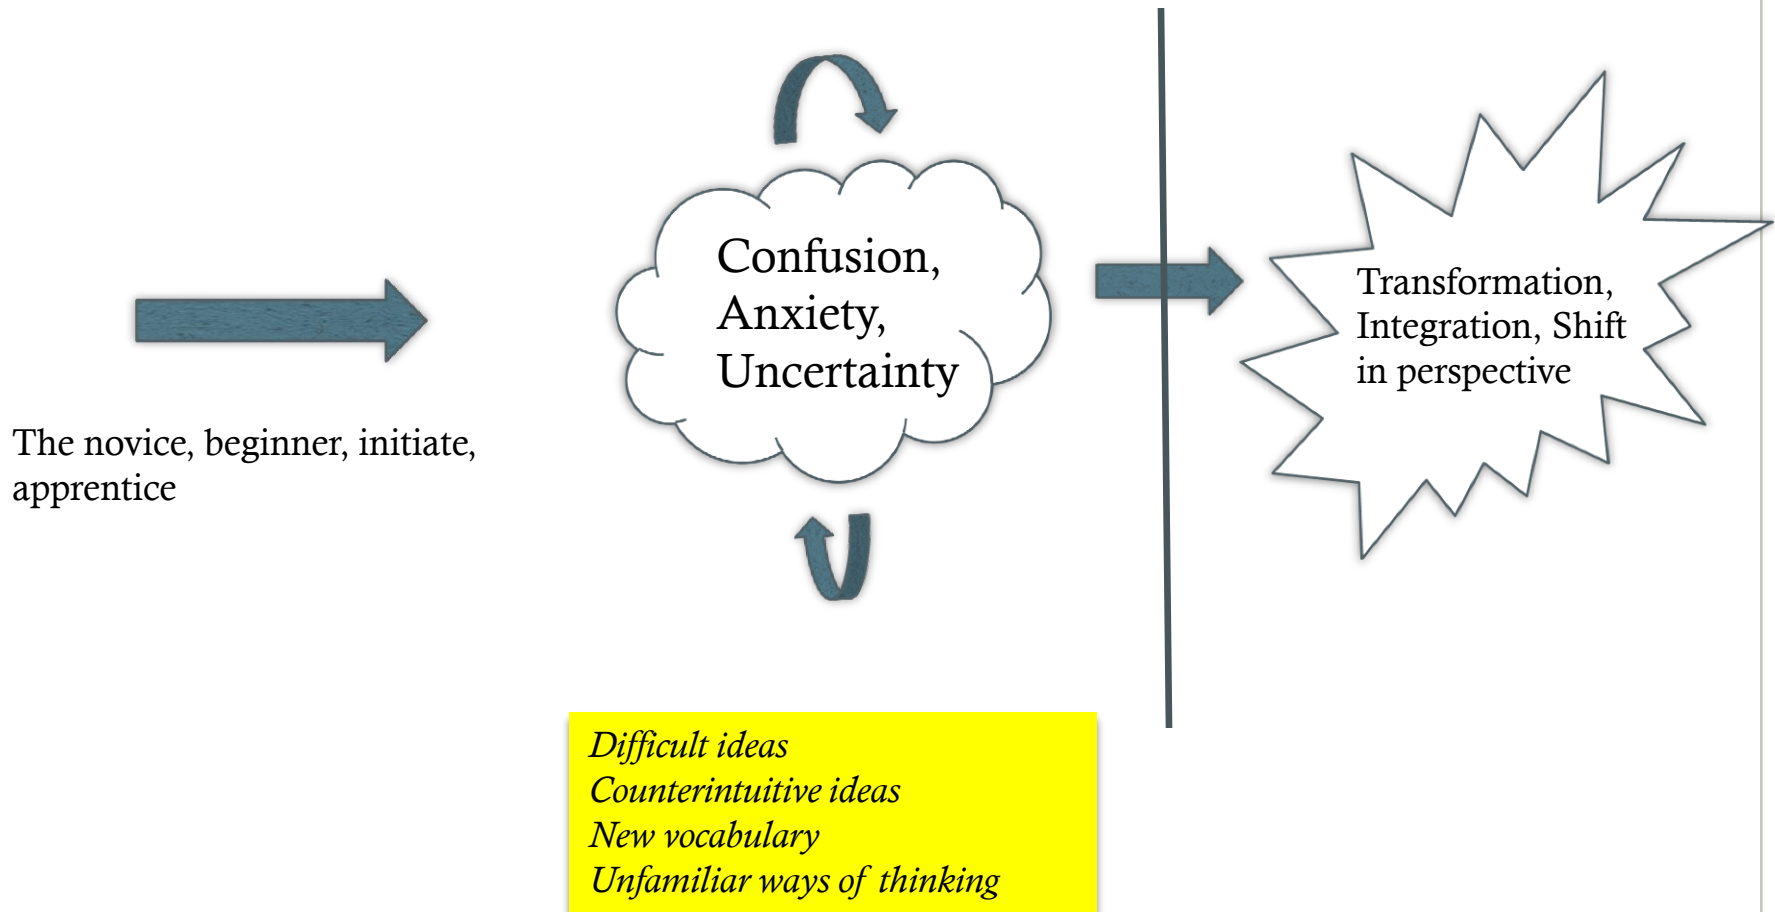

---

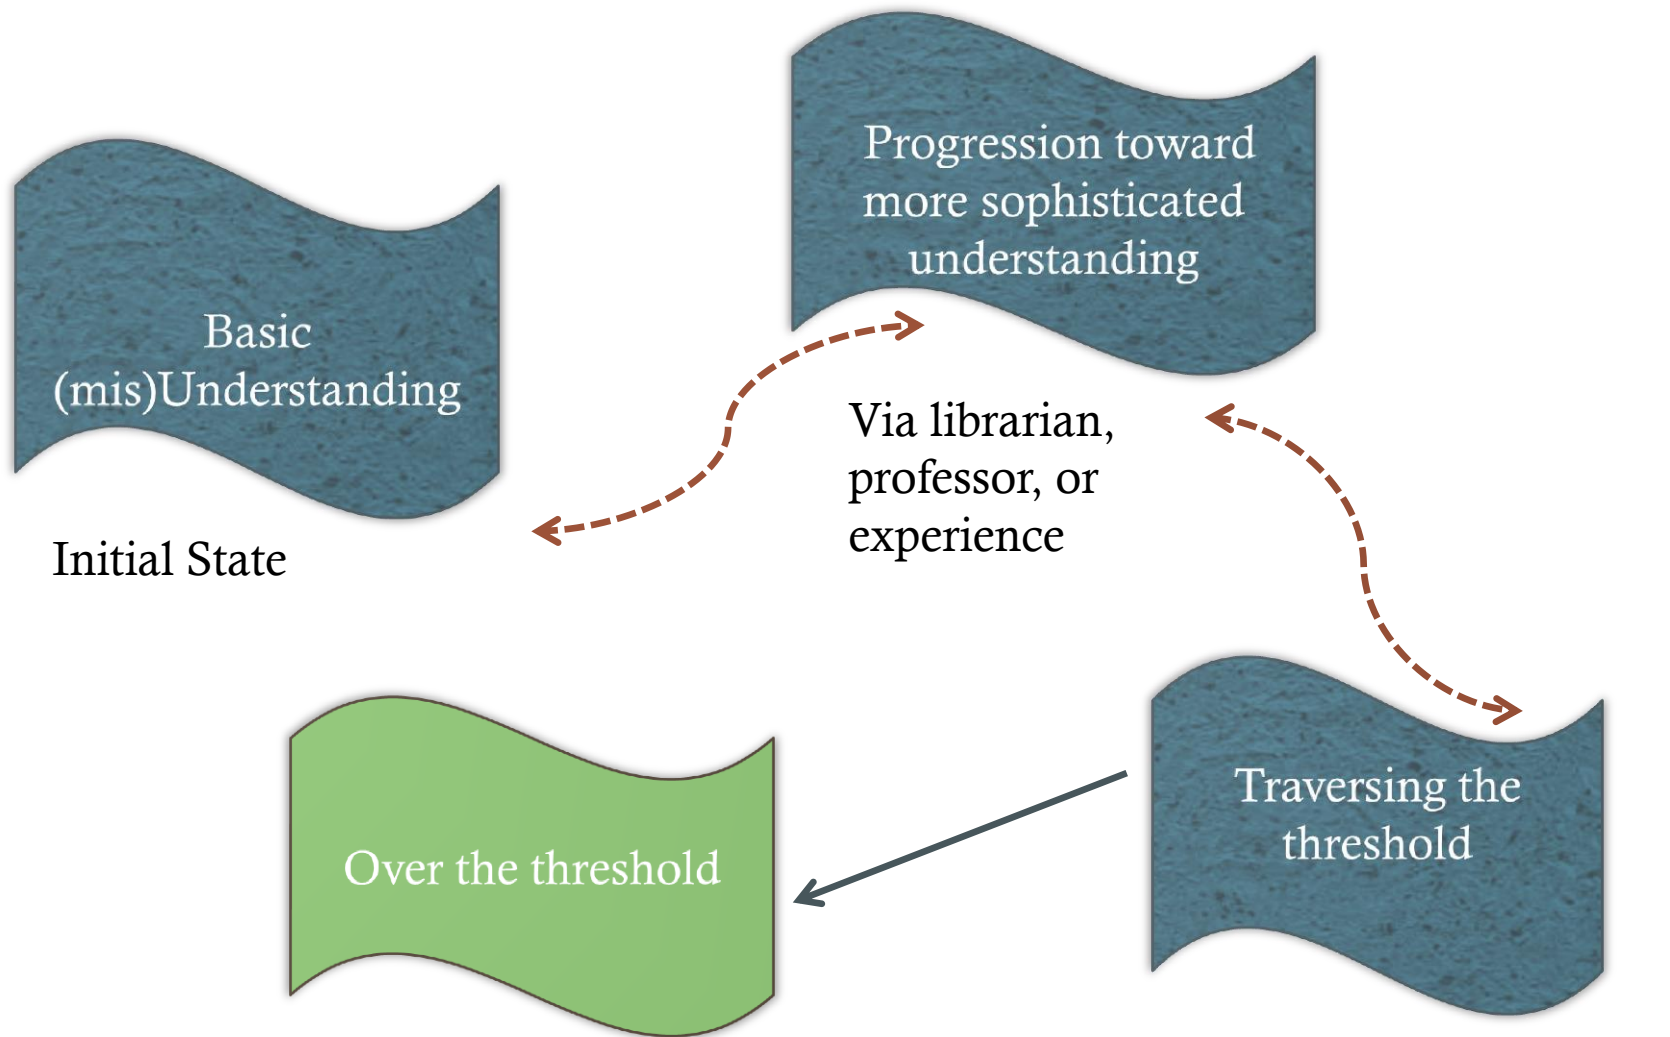

- Early decision to use as the underpinning of the new Framework
- Based on work emanating from the United Kingdom: Meyer and Land, economics
- For information literacy, work by Townsend, Hofer, Brunetti and Lu

# Threshold Concepts

- A passage through a portal or gateway: gaining a new view of a subject landscape
- Involve a “rite of passage” to a new level of understanding: a crucial transition
- Require movement through a “liminal” space which is challenging, unsettling, disturbing—where the student may become “stuck”

# The Liminal State

## Learner Progression for a Threshold

# Threshold Concepts

---

Transformative

Integrative

Irreversible

Bounded

Troublesome

Hofer, Townsend, and Brunetti, 2012, 387-88, quoting Meyer and Land

# Threshold Concepts in Disciplines

- *Geology*: the scale of geologic time
- *Economics*: opportunity cost
- *Accounting*: depreciation
- *History*: no unitary account of the past
- *Writing / rhetoric studies*: audience, purpose, situated practice, genre
- *Biology*: photosynthesis

# Threshold Concepts for IL

- Authority is Constructed and Contextual
- Information Creation as a Process
- Information Has Value
- Research as Inquiry
- Scholarship as Conversation
- Searching as Strategic Exploration

The concepts were identified through an ongoing Delphi study being conducted by L. Townsend, A. R. Hofer, S. Lu, and K. Brunetti, though the Task Force took some of them in new directions

# Frame: AUTHORITY IS CONSTRUCTED and CONTEXTUAL

Information resources reflect their creators' expertise and credibility, and are evaluated based on the information need and the context in which the information will be used. Authority is constructed in that various communities may recognize different types of authority. It is contextual in that the information need may help to determine the level of authority required.

# AUTHORITY IS CONSTRUCTED and CONTEXTUAL

## Knowledge Practices

Learners who are developing their information literate abilities do the following:

- Define different types of authority, such as subject expertise (e.g., scholarship), societal position (e.g., public office or title), or special experience (e.g., participating in a historic event).
- Use research tools and indicators of authority to determine the credibility of sources, understanding the elements that might temper this credibility.
- Understand that many disciplines have acknowledged authorities in the sense of well-known scholars and publications that are widely considered “standard”. Even in those situations, some scholars would challenge the authority of those sources.

# AUTHORITY IS CONSTRUCTED and CONTEXTUAL

## Dispositions

Learners who are developing their information literate abilities are:

- Inclined to develop and maintain an open mind when encountering varied and sometimes conflicting perspectives.
- Motivated to find authoritative sources, recognizing that authority may be conferred or manifested in unexpected ways.
- Aware of the importance of assessing content with a skeptical stance with a self-awareness of their own biases and worldview.

# Another, similar, Model . . .

# Backward Design (Wiggins & McTighe)

## 3 Stages of ("Backward") Design

1. Identify desired results

2. Determine acceptable evidence

3. Plan learning experiences & instruction

# Potential of the Framework

# Curriculum Redesign

# Curriculum Design Considerations

- Want students to stay in liminal state long enough to learn (B. Fister)
- Design with your colleagues who teach
- Work with faculty to develop assignments
- Position frames strategically across the curriculum
- Align threshold concepts with learning outcomes (or create new learning outcomes)

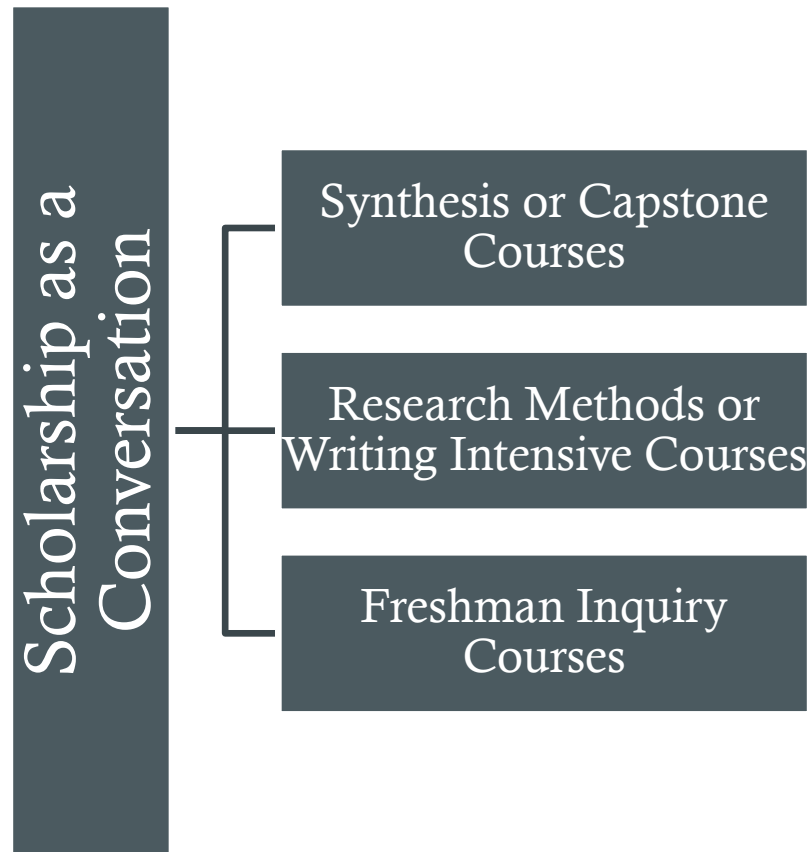

# Curriculum Design Considerations

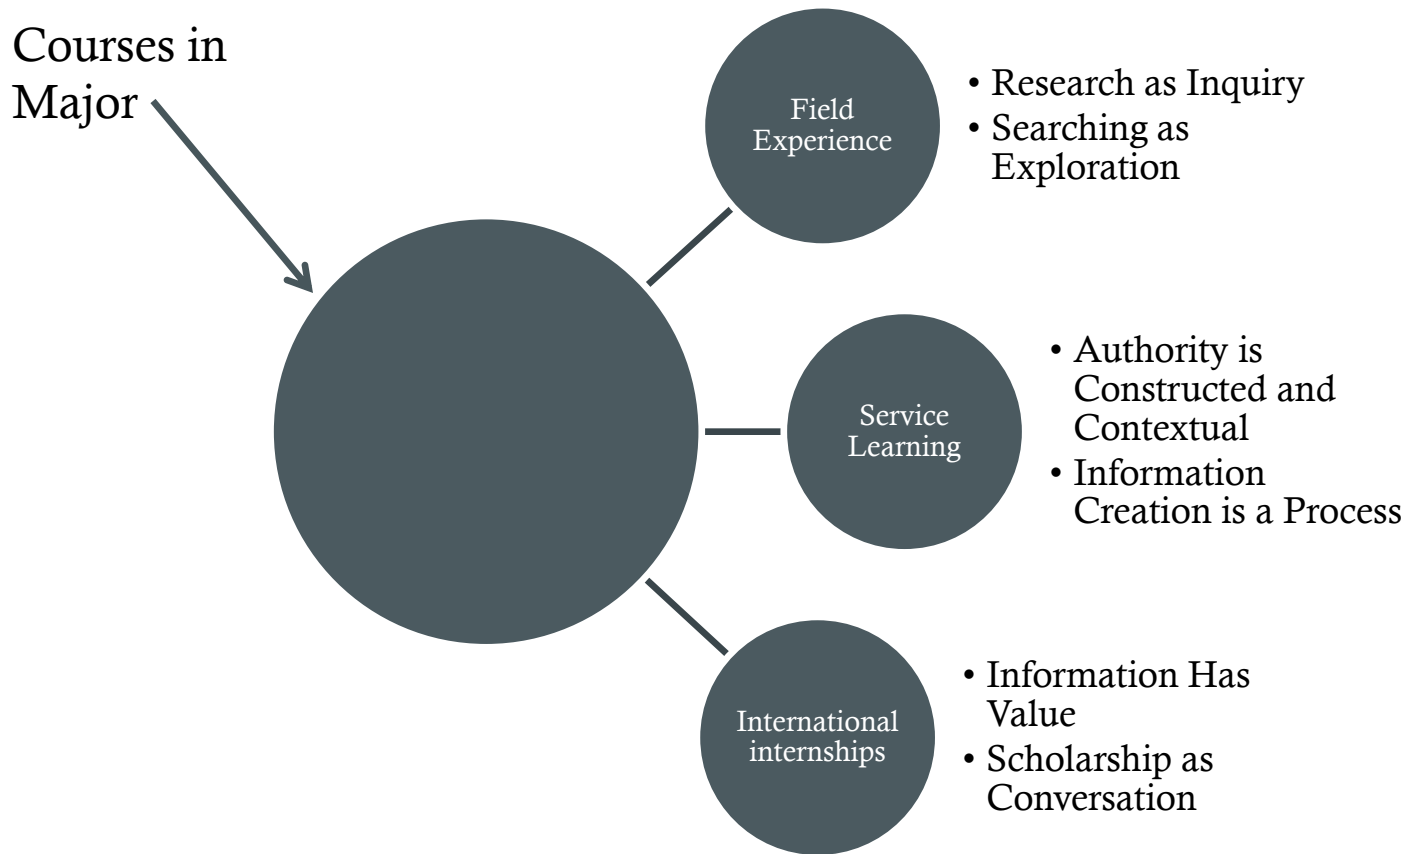

- Design learning activities or lessons around threshold concepts
- Allow for confusion and uncertainty
- Revisit the concept more than once
- Revise learning outcomes if necessary

Adapted from: “Threshold Concepts: Strategies and Approaches.” Office of Learning and Teaching, Southern Cross University. Available at: <http://scu.edu.au/teachinglearning.index.php/92>)

# Curricular Positioning

# Co-Curricular Positioning

# Starting to Think about Assessment

Megan Oakleaf

“A Roadmap for Assessing Student Learning  
Using the New Framework for Information  
Literacy for Higher Education”

<http://meganoakleaf.info/framework.pdf>

# Learning Outcomes

Write learning outcomes  
(ideally, locally)

Follow precepts of the  
Understanding by Design  
Model (Wiggins and  
McTighe, 2005), in which  
outcomes drive the design  
of pedagogy and  
assessment

## Oakleaf's Roadmap

# Ideas from the Roadmap

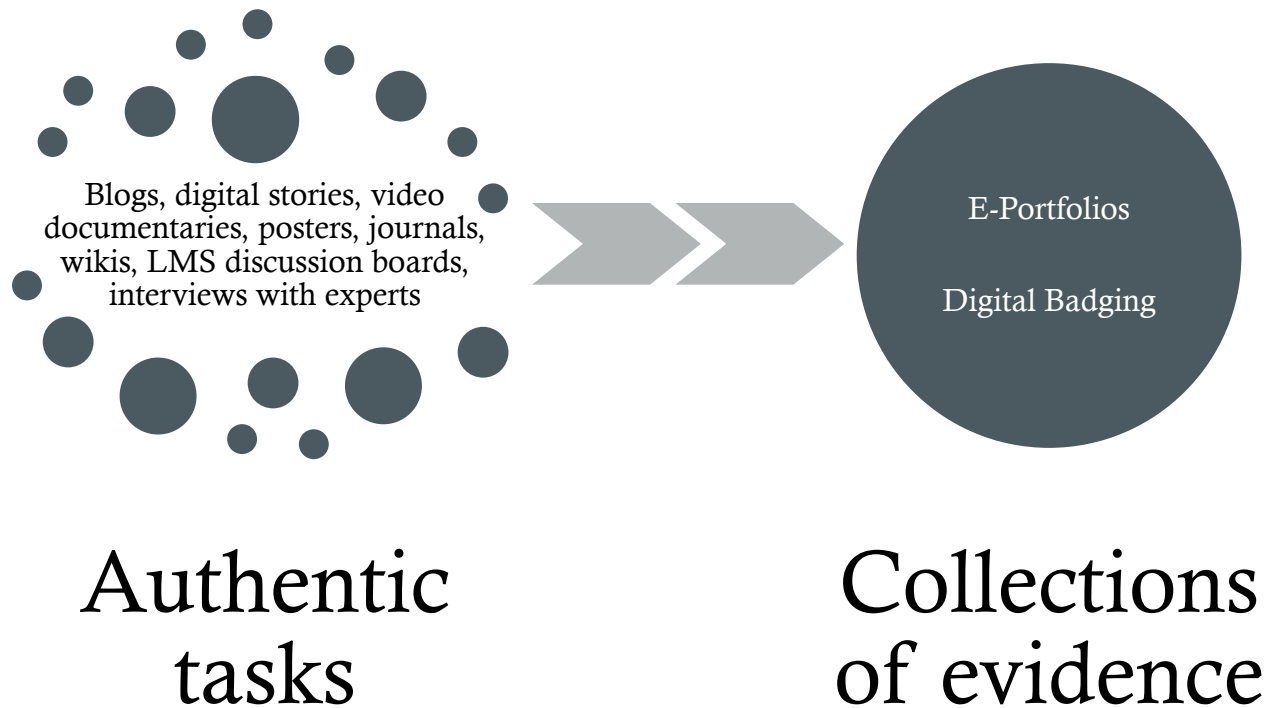

Oakleaf cites Meyer and Land (2010):

Need to avoid assessments that allow mimicry

Rather, declarative approach where students represent their knowledge, such as concept maps, portfolios, logs, blogs, diaries

# Intermediate Thinking Processes

# Moving Forward

- Encourage conversations/educational efforts amongst librarians who teach
- Start conversations with faculty AND students
- Find key allies in administration
- Enlist support from teaching and learning centers
- Develop communities of practice
- Don't hesitate to try out what you've created/heard today

Lingering  
thoughts or  
questions?
